

V.3.3 DESCRIPTION OF FORECAST COMPONENT OPERATIONS

This Section contains documentation for each of the available Operations.

The Operations are identified by the identifiers given in Section V.3.2.

The documentation for each Operation includes the following:

- o the programs in which the Operation can be used
- o a description of the Operation
- o information about the time series that can be used to supply input data and store output results
- o a summary of the card input needed for each Operation when defining the Operations Table
- o sample input, output and error messages
